<p>I. BACKGROUND</p> <p>The Enterprise Resource Planning – Oil Products Information System (ERP-OPIS) is a system being developed for the Oil Industry Management Bureau that allows clients transacting with the DOE to register, submit requirements, as well as monitor and receive approvals online.</p> <p>The ERP-OPIS enables the DOE to monitor stakeholder compliance and to have near real-time data and information on oil product inventory and prices, and oil and LPG facilities. The system also allows the OIMB to generate inspection reports using a uniform and digital format that is immediately viewable by the inspected person/entity and authorized users in the DOE.</p> <p>These features are handled by the ERP-OPIS through five applications, which are interconnected through the SAP Cloud Platform. Access to the SAP Cloud Platform and its modules/components are provided through a license.</p> <p>The applications designed for ERP-OPIS include the following:</p> <p>A. Application 1: The Downstream Oil Online Portal (DOOP) solution is an online portal that allows end-users to access the different applications integrated into the solution, it also serves as the User Administration and Management Tool for user access and role identification.</p> <p>B. Application 2: Oil Product Information System is a software application that allows OIMB's Client users to manage the prices of products and brands that they sell and submit reportorial based on their transactions, facilities, operations, and inventory. The system also enables OIMB Admin users to view all client submitted reports and process them for evaluation and review. The system also allows OIMB Admin users to review feedback sent by public users related to the prices of their products and brands.</p> <p>C. Application 3: Generated Report and Dashboards of SAP Analytics Cloud solution combines BI, augmented, and predictive analytics, and planning capabilities into one cloud environment. As the analytics layer of SAP's Business Technology Platform, it supports advanced analytics enterprise-wide. This includes Executive Dashboard, a software application that runs</p>	

on SAP Analytics Cloud (SAC). It allows OIMB Admin users to view dashboards based on the data gathered from the different DOE Apps and generate reports.

D. Application 4: Downstream Oil Client Service Application Tracker (DOCSAT Web and Mobile) is a software application that allows OIMB's Client users to manage Client Service Applications (CSA). The system also enables OIMB Admin users to view all client-submitted CSAs and process the evaluation, review, and approval of each CSA. This service has two platforms: namely DOCSAT Web for the online portal that allows users to view, submit, process, and monitor CSAs, and DOCSAT Mobile for the mobile application that allows users to view and approve CSAs.

E. Application 5: Mobile Inspection App

1. Inspection Assignment Admin (IAA) is an inspection data repository, data management, and report generation system for inspection orders.
2. Mobile Inspection App (MIA) is a data repository, data management, and report generation of the results of the inspection.

II. OBJECTIVE

The main objective of the procurement is for the SAP license to run for one year to ensure that the 5 applications running on the SAP Cloud Platform as part of the ERP-OPIS project are fully functional and operational.
